

Ahmed Zaki Al-Gabaly

United Arab Emirates

[Ahmed Zaki Al-Gabaly](#)

[AhmedWritesCode](#)

Software Engineering fresh graduate with hands-on internship experience in full-stack development and the software development lifecycle (SDLC). Possesses a strong foundation in modern web frameworks (Spring Boot, Angular) and practical exposure to working with live codebases. Eager to bring problem-solving skills, adaptability, and a strong willingness to learn to a Junior Developer role in the UAE tech industry.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honors

Universiti Teknologi Malaysia (UTM) • Malaysia, Johor Bahru (JB) • 2026 • 3.76 GPA (Dean's Award)

High School – Advanced (Science) Track

Ajman Private School • UAE, Ajman • 2021 • 96.59%

EXPERIENCE

Software Engineer Intern

BigLedger (Wavelet Subsidiary) – Greater Kuala Lumpur, Malaysia

Sep 2025 – Feb 2026

- Development of a Full-Stack Enterprise Application by utilizing **Angular** for frontend architecture and **Spring Boot** for scalable backend services.
- Built and optimized comprehensive **data pipelines** using **Pentaho** to streamline data migration and processing workflows.
- Collaborated within an agile cross-functional team using **Git/GitHub** for version control and **Jira** for sprint tracking and project management.
- Engineered and maintained production-grade software features within **live enterprise codebases**, directly handling **real client data** and ensuring system reliability.

SKILLS

Languages

Arabic (Native), English (Fluent)

Soft Skills

Teamwork and Communication, Microsoft Office Tools, Project Management, Documentation, Presentation, Problem Solving, Critical Thinking, Attention to Details

Hard Skills

Full-Stack Development (Backend Development, Frontend Development), Object Oriented Programming, Enterprise Software Application, Software Development Life Cycle (SDLC), Web Development, Mobile App Development, System Design, System Architecture.

Languages and Frameworks: Spring Boot, Java / Java EE, Python, C++, Django, Angular, Vue.js, JavaScript, TypeScript, CSS, HTML
Artificial Intelligence: Claude / Cursor / Antigravity, Prompt Engineering
Data and Databases: SQL, PostgreSQL, Cloud Storage (Buckets), Data Pipelines with Pentaho
DevOps: Version Control with Git and GitHub, Deployment and Docker Containerization, Basic CI/CD Workflows

CERTIFICATIONS

CS50's Web Programming with Python and JavaScript	Harvard University
Angular Fundamentals	Frontend Masters
Cursor & Claude Code: Professional AI Setup	Frontend Masters
Claude 101	Anthropic
Introduction to Generative AI	Google Cloud
Introduction to Large Language Models	Google Cloud
Introduction to Responsible AI	Google Cloud
1 Million Prompters	Dubai Future Foundation & DCAI

PROJECTS

DeltaFlow - Web-based Financial Management System with AI Integration (<https://deltaflow-ai.vercel.app/>):

Built with **Spring Boot** for the backend and **Angular with Tailwind CSS** for the user interface. Uses **PostgreSQL** hosted on **Supabase** for financial data and cloud storage, with **Gemini AI** supporting financial assistance and receipt-based transaction extraction.

Orotick - Productivity App (<https://www.orotick.tech/>):

Built with **Django** and **Vanilla JavaScript** as a productivity platform for managing tasks, habits, Pomodoro sessions, and personal analytics.

Faculty of Computing Timetable Website (<https://github.com/AhmedWritesCode/FSKSM>):

Developed with **HTML**, **CSS**, and **JavaScript**, integrating the UTM API to display courses, timetables, student profiles, and timetable comparisons.

Betalink - Academic Resource Sharing System (<https://github.com/AhmedWritesCode/Betalink>):

A web app for sharing academic materials among students, Integrated UTM's official API for authentication. Built with **Vue.js** for Frontend and **Node.js** with **Express** for Backend.

Management Information System for TVPSS (<https://github.com/AhmedWritesCode/TVPSS-MIS>):

Built with **Spring MVC**, **JSP**, **Hibernate**, and **MySQL** to manage school media activities, records, and administrative information.

SpeedRush - Simple OOP-based Game (<https://github.com/AhmedWritesCode/SpeedRush>):

A **C++** game built using an old legacy graphics library to explore object-oriented design under constraints.

Real Time Vehicle Control (https://github.com/AhmedWritesCode/RTSE_Phase_1_V1.0):

Python autonomous-driving script using **OpenCV**, **NumPy**, **sockets**, and **multithreading** to control the game instead of a human player, process camera input, and overcome in-game driving challenges automatically.

Recipe Management System (<https://github.com/AhmedWritesCode/Recipe-MIS>):

Developed with **PHP**, **MySQL**, **HTML**, **CSS**, and **JavaScript** to manage user recipes, including creation, editing, categorization, searching, and favorites.

Portfolio (<https://portfolio-roan-nine-90.vercel.app/>):

Responsive personal developer portfolio Integrated with **VectorShift AI**, featuring project showcases, contact forms, themes, and an Integrated AI Assistant.
